# Environmentally Responsible Packaging & Cleaning

The SOCIUS Network is one of the leading distributors of catering disposables, paper hygiene, glassware & crockery, food packaging and chemicals to the catering market. The SOCIUS Network was founded in 2008 to represent Independent Distributors of non-food products to the foodservice and janitorial sectors. With over 20 locations covering the UK, Ireland and the Channel Islands who seek to promote the benefits of purchasing goods and services together.

## Meeting every need

We have a clear focus and are able to use our insight into the distribution sector to truly recognise and understand the needs of our customers, from new product development to suitable environmental solutions, with an extensive range of over 15,000 products.

## Sustainable, high quality & cost effective

The Also Green range has been carefully sourced to minimise its impact on the environment and to ensure we meet internationally recognised standards and accreditations.

A high percentage of the Also Green range is manufactured in the British Isles to support our commitment to the reduction of our carbon footprint.

As we are one of the largest distributor networks in the UK, Ireland and Channel Islands all of the Also Green products are sourced directly through our **SUPPLIER PARTNERS**. This enables our members to reduce the supply chain links and at the same time reducing their carbon footprint.

**The Socius Network is a prominent member of the Foodservice Packaging Association (FPA).**

## Custom Print

We specialise in working with Customers brands and designs across the ranges to produce stunning bespoke products.

# Environmentally Responsible Packaging & Cleaning

The Also Green range includes one or more of these credentials:

#### Compostable

Breaks down in 8-12 weeks into natural organic compost, within commercial composting facilities

#### Biodegradable

Breaks down by the action of microorganisms in to the natural environment

#### Made from recycled content

Includes a high percentage of recycled material

#### Recyclable

Can be recycled into new products, within commercial recycling facilities

#### Nordic Swan

Internationally recognised guarantee of a products environmental credentials

#### BRC

The globally recognised food safety standard

#### Made in the British Isles

#### OK compost

Complies with European standard for compostability (EN13432) in commercial composting facilities

#### EN13432

The international accreditation for compostability

#### Forestry Stewardship Council

Products come from wood fibre sourced from FSC certified forests

#### Ecolabel

Every part of the process from production to the finished product adheres to stringent green guidelines

#### TCF

Pulp is also bleached in either TCF (Totally Chlorine Free) or ECF (Elementary Chlorine Free) processes

#### Sourced within the EU

## Materials

#### Bagasse

Dry pulpy residue left after harvesting sugar cane

#### Palm Leaf

Fallen leaves from Areca palms

#### PLA - Poly Lactic Acid

A natural polymer extracted from plants

#### rPET

A 100% recycled polymer (PET)

#### Pulp

Recycled wood and paper fibers

Also Green Handtowels from the Worlds first next generation Bio Product Mill - Page 14

The Also Green paper cup range of Single wall and Double wall solutions for hot beverages, using paper board from sustainable managed forests.

## Single Wall

BIOWARE hot cups are stylish and environmentally friendly - with a new 'Love Nature' design in a wide range of sizes. As well as being made from 100% TCF certified paperboard, our BIOWARE cups are both **biodegradable** and **compostable**.

Made from 100% virgin pulp\*, a high percentage of the material comes from the world's first Bioproduct mill.

- Metsä Group has built the world's first next-generation bioproduct mill In Äänekoski, Finland on the area of their existing pulp mill.
- The mill produces 1.3 million tonnes of pulp per year - nearly three times the annual production of the current mill.
- The mill began operation in August 2017.
- The mill is a closed loop production process and is completely self-sustaining.
- It generates 240% more energy than it needs, Metsä Group contributes over 16% of Finland's Bio-energy.
- 100% of the waste products are re-used.
- The mill uses **ZERO** fossil fuels.
- **Recyclable** / Reusable Handybags (Luxury only).
- Fits through most dispensers reducing the environmental burden of change.
- Handtowels will break down within 3 weeks of going to landfill or can be burned as Bio-fuel.

## DID YOU KNOW?

The amount of wood used by the bioproduct mill in one day grows in Finnish forests in less than an hour!
